Description

Kentec addressable sounder controller units enable additional, distributed power and control for sounder circuits in situations where there are insufficient circuits at the fire alarm control panel or where additional power is required to power heavily loaded sounder circuits.

Sounder control modules for any of the protocols supported by Kentec analogue addressable control panels are available in a steel enclosure designed to match the appearance of all Kentec's fire alarm control panel range.

All units contain mains powered battery charger/ power supply, they have space for up to 7 Ah batteries.

Indicators are provided for power healthy and power fault conditions and power fault conditions are signaled to the fire alarm control panel as a sounder fault.
